me: @jhollist

Who, what, why, and how?

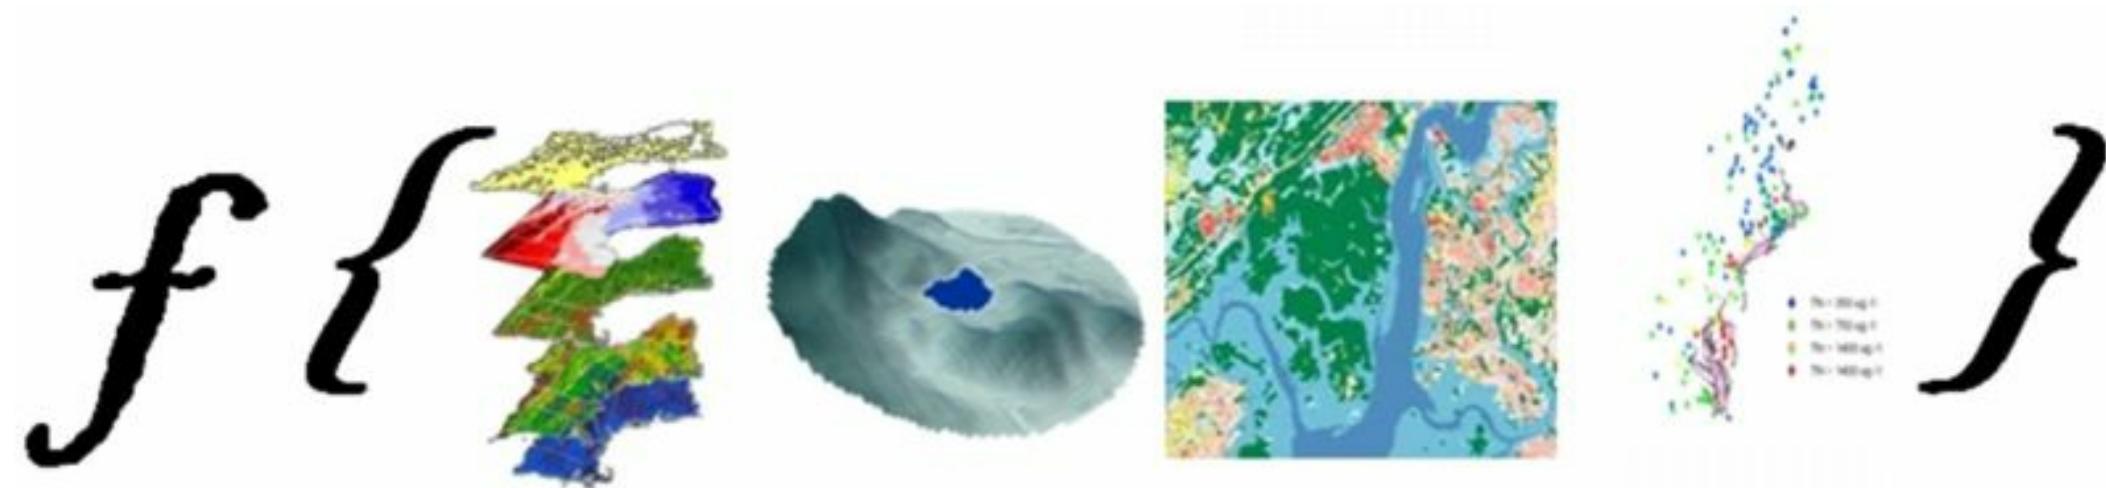

Who are we?

- Ecologists
- Computational focus
 - Enough to be dangerous
- 3 FTE
 - Myself
 - Betty Kreakie
 - Bryan Milstead
- 2 Post-docs
 - Farnaz Nojavan
 - Stephen Shivers

What do we do?

- Apply computational approaches to understand water quality impacts in lakes
- Open Science

What is open science?

- Access to materials
- Reproducible/ Repeatable
- The Web!
- A process, not a state

Why open science?

- Often required
 - Government/Funders/Journals
- Benefits researchers
 - [McIernan et al. \(2016\) How open science helps researchers succeed](#)
- Improves quality
 - [The classic example: Reinhart and Rogoff](#)
- Benefits to society
 - ["Sharing of Data Leads to Progress on Alzheimer's"](#)

How are we open?

- R package development
 - Research compendia
 - Tooling for common problems
- Visualization
- Sharing and collaborating
- Publishing
- Apply to our research efforts

R Packages

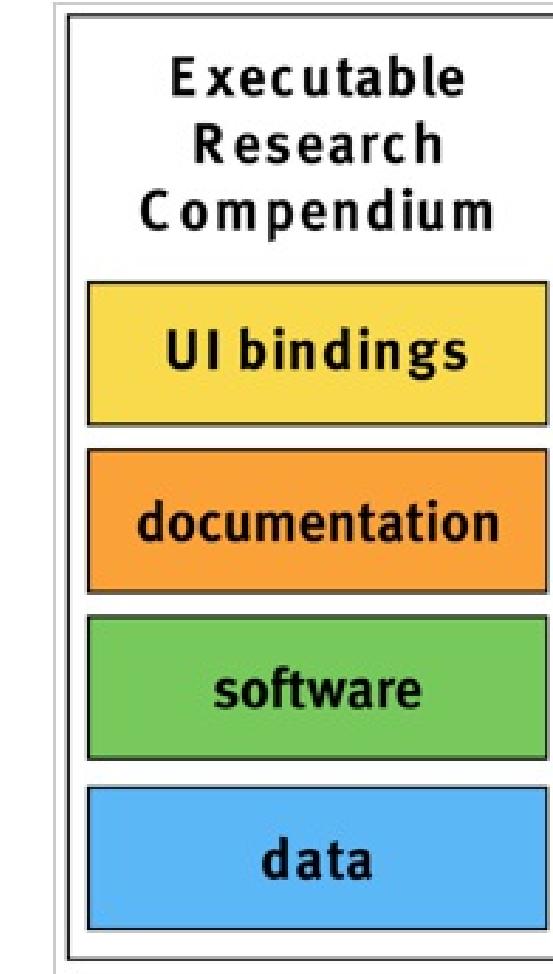

Why R Packages

- Useful structure
- Infrastructure for sharing
 - GitHub
 - CRAN
- We are an R shop!

Research Compendia

- Define
- Origins
 - [Gentleman and Lang \(2004\)](#)
- Part of
 - Reproducible Research
 - Literate Programming (ala Donald Knuth)
- ROpenSci efforts
 - [rrrpkgs](#)
 - [ROpenSci unconf 2017 discussion](#)

from Nüst, Konkol, et al (2017),
<https://doi.org/10.1045/january2017-nuest>

Packages as Research Compendia

- R, Data, and Vignettes folders
- Other examples
 - [Carl Boettiger's template](#)
 - [Ben Marwick](#)
- Our examples
 - <https://github.com/usepa/LakeTrophicModelling>
 - <https://github.com/usepa/Microcystinchla>
- GitHub and Zenodo (Archive)

The image shows two side-by-side browser windows. The left window is a GitHub repository page for 'USEPA / Microcystinchla'. It displays a list of 91 commits, 2 branches, 2 releases, and 3 contributors. The right window is a Zenodo archive page for the same package. It shows a summary of the data, including the title 'Associations between chlorophyll a and various microcystin health advisory concentrations' by Hollister, Jeffrey W. & Kreakie, Betty J., and a detailed abstract about microcystin health impacts and advisory levels. Both pages include links to download files like 'Microcystinchla 2.0.tar.gz'.

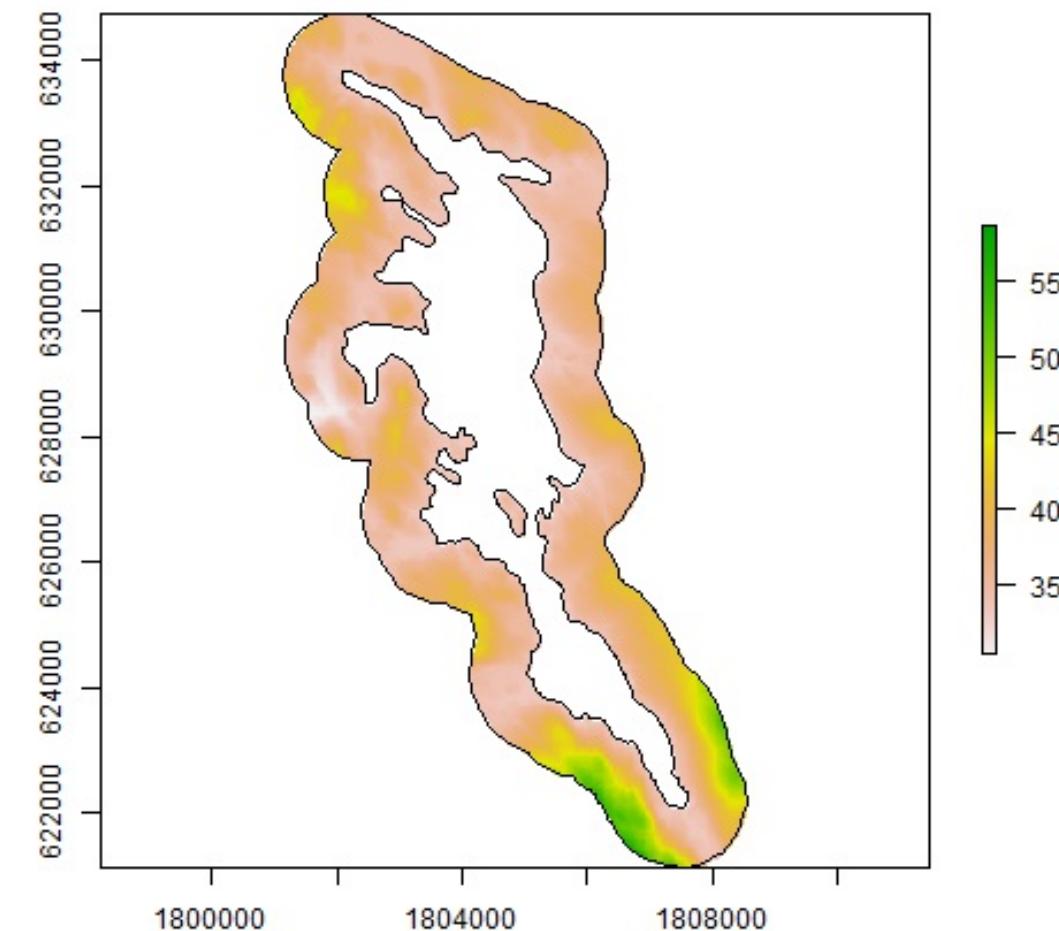

Packages to solve common problems

- lakemorpho
- elevatr
- goatscape (in development)

lakemorpho

- Lake morphometry metrics in R
- Version 1.0
 - August 2014
- Version 1.1.0
 - December 2016
- sf support to be added
- [National Lake Morphometry](#)
- [Hollister and Milstead \(2010\)](#)
- [Hollister *et. al.* \(2011\)](#)
- [Hollister and Stachelek \(2017\)](#)

The screenshot shows a web browser window with multiple tabs open at the top. The active tab displays the homepage of the journal "Ecological Indicators". The page features the Elsevier logo, a search bar, and a menu icon. Below the header, there is a navigation bar with links to "Home", "Journals", and "Ecological Indicators". A thumbnail image of the journal cover is shown, along with the ISSN: 1470-160X. To the right, the journal's title "Ecological Indicators" is displayed, followed by its subtitle "Integrating Sciences for Monitoring, Assessment and Management". A list of features includes "Supports Open Access" and "Editor-in-Chief: J.C. Marques". At the bottom, there are buttons for "Submit Your Paper" and "View Articles". A descriptive text block explains the journal's purpose: "The ultimate aim of *Ecological Indicators* is to integrate the monitoring and assessment of ecological and environmental indicators with management practices. The journal provides a forum for the discussion of the applied scientific development and review of traditional indicator applications as well...". A "Read more" link is also present. The browser interface includes a toolbar with various icons and a sidebar with bookmarked sites like "One EPA Workplace", "Mail - HollisterJeff@epa", and "RStudio - region7_r".

The screenshot shows a web browser with multiple tabs open. The active tab is for the F1000Research website, which has an orange header with the text 'F1000Research Open for Science'. The main content area displays a research article titled 'Associations between chlorophyll a and various microcystin health advisory concentrations [version 2; referees: 1 approved, 2 approved with reservations]'. The article is authored by Jeffrey W. Hollister and Betty J. Kreakie. The page includes sections for 'Abstract', 'Metrics' (587 views, 285 downloads), and 'Open Peer Review' (with three versions and three invited referees). The footer of the page indicates 'All reports (4), Responses and comments (3)'.

RESEARCH ARTICLE

REVISED Associations between chlorophyll a and various microcystin health advisory concentrations [version 2; referees: 1 approved, 2 approved with reservations]

✉ Jeffrey W. Hollister , Betty J. Kreakie

+ Author details

+ Grant information

Abstract

Cyanobacteria harmful algal blooms (cHABs) are associated with a wide range of adverse health effects that stem mostly from the presence of cyanotoxins. To help protect against these impacts, several health advisory levels have been set for some toxins. In particular, one of the more common toxins, microcystin, has several advisory levels set for drinking water and recreational use. However, compared to other water quality measures, field measurements of microcystin are not commonly available due to cost and advanced understanding required to interpret results. Addressing these issues will take time and resources. Thus, there is utility in finding indicators of microcystin that are already widely available, can be estimated quickly and *in situ*, and used as a first defense against high levels of microcystin. Chlorophyll a is commonly measured, can be estimated *in situ*, and has been shown to be positively associated with microcystin. In this paper, we use this association to
